

How to Create DVDs

This Pixorial Tutorial covers how to create a DVD. You can start with a master video that you've either uploaded or sent in for conversion, or, if you've tagged any scenes, you can click on one or more of those. With the master selected, click on the Create Stuff button. This will launch Producer.

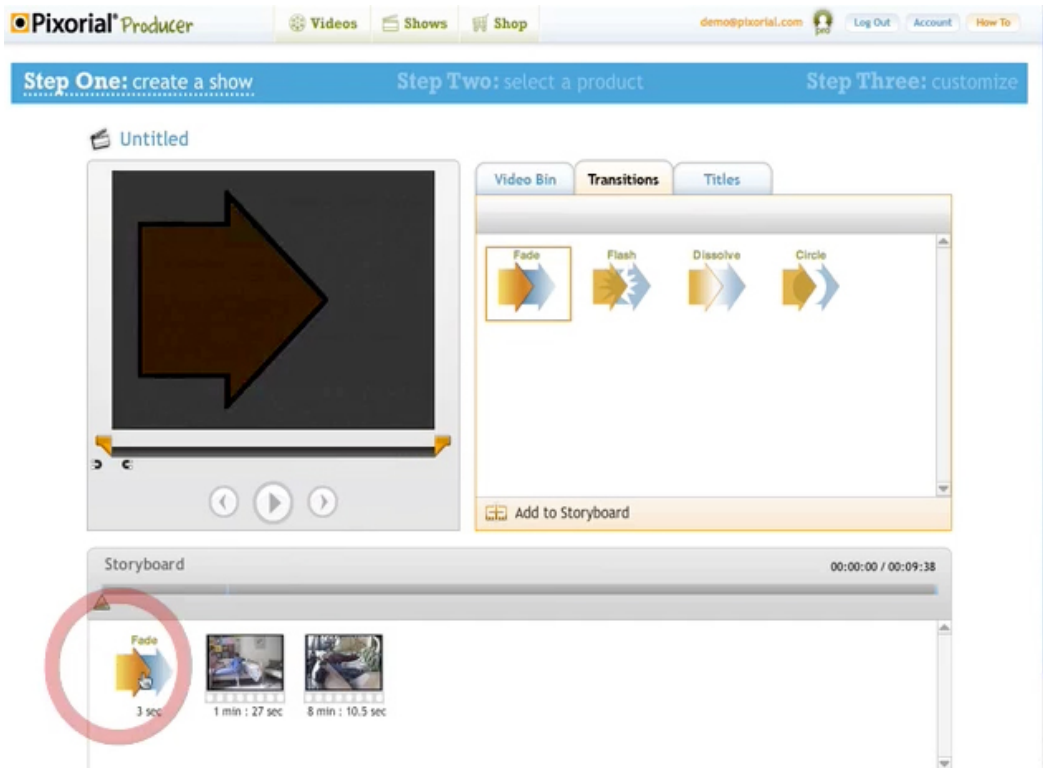

To make any product, you start by creating a Show. We tried to make that clear by displaying the step by step process at the top. Step One is to Create a Show, Step Two is to Select the product you would like to distribute, then Step Three is to customize the product if there is customization involved with the selected product.

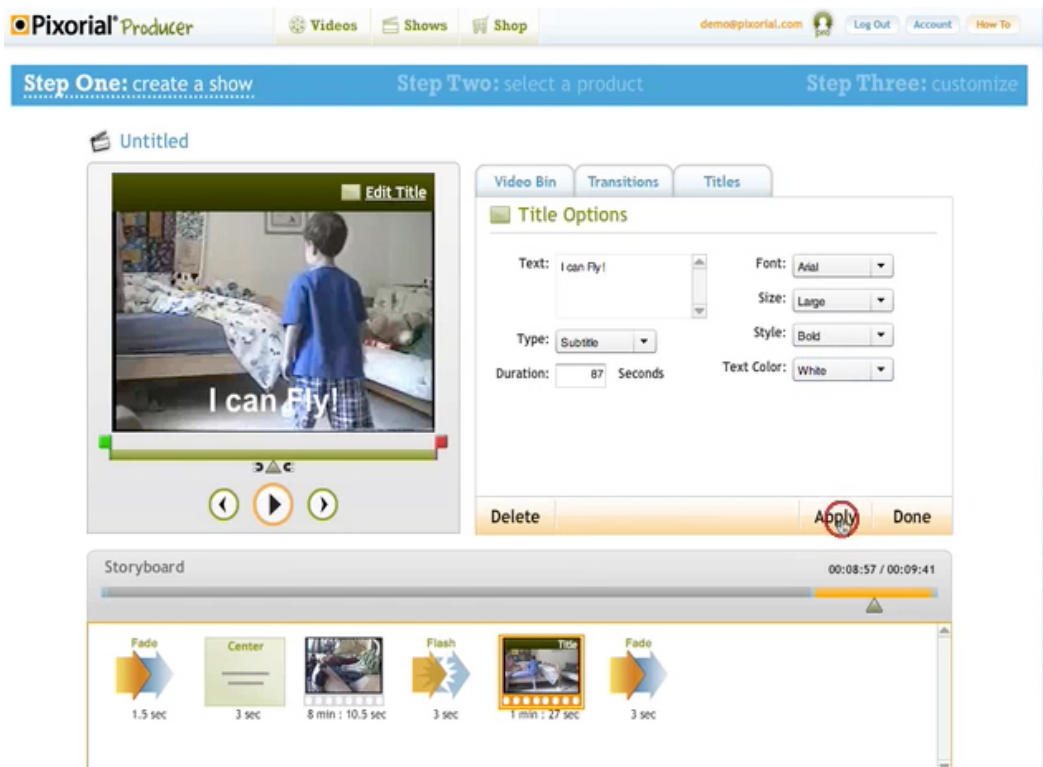

The first thing I want to do is drag the video clip to the Storyboard.

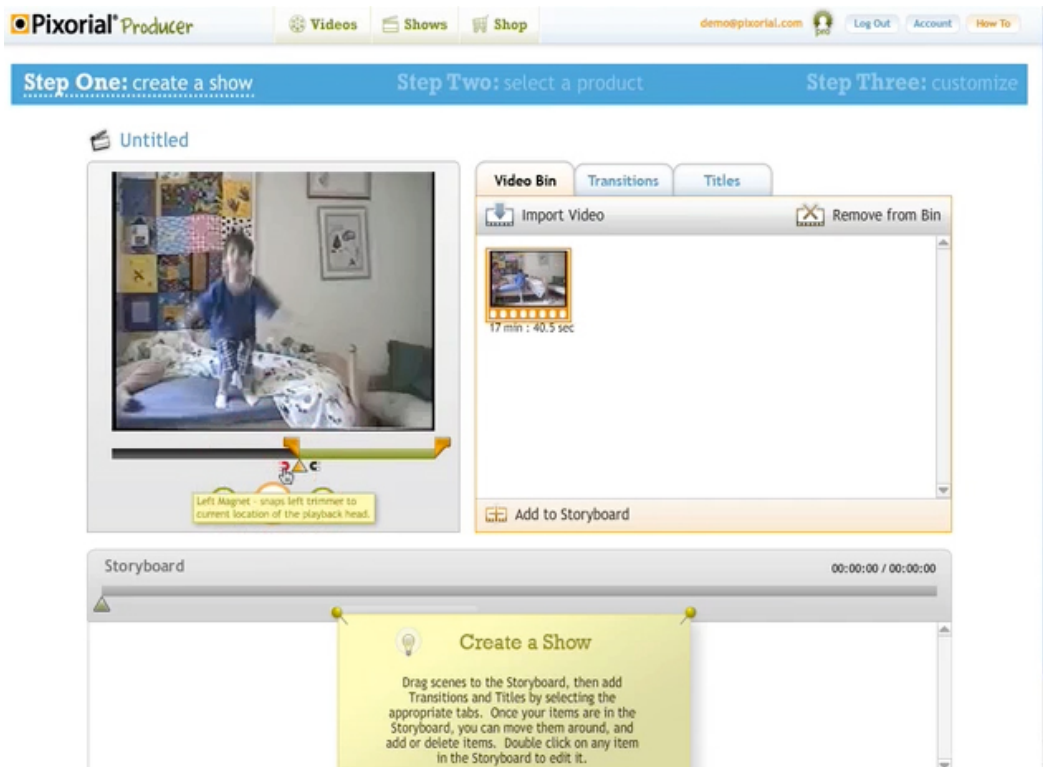

Once it's in the Storyboard, you can simply click Save and then continue on to the next step, or you might want to add a transition and a title. At the very least, it's nice to Fade In at the beginning and Fade out at the end.

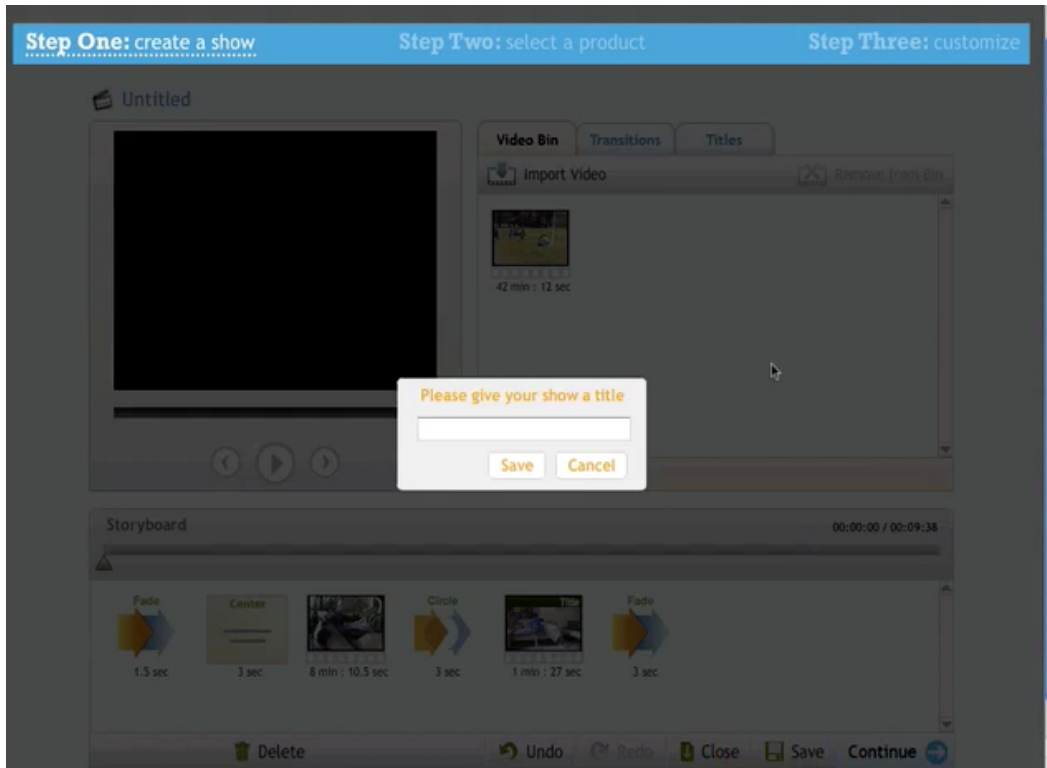

Then, add a title to introduce your show. Note that you can change the Font, the Size, the Style, and the Color of the text and then click “Apply”.

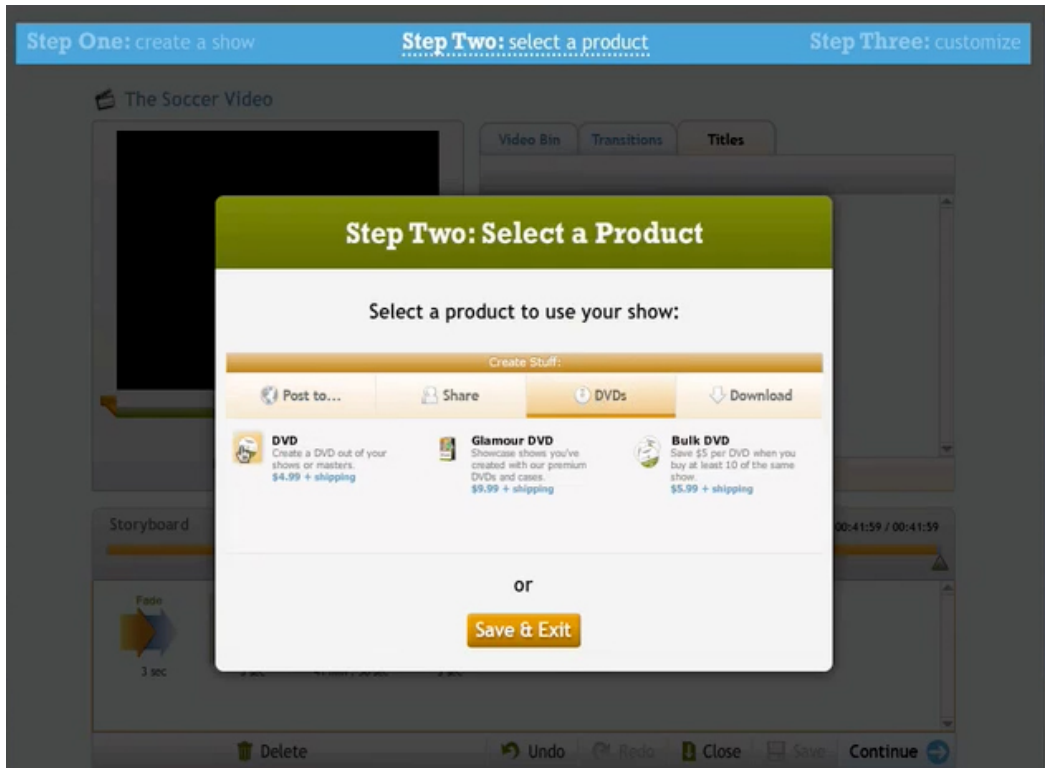

You can check how it looks by clicking on the Fade Transition and then press the play button. You can also check the transition at the end by doing the same. If an adjustment needs to be made, you can drag the left or right trimmer directly to make sure the video starts and ends at the right place.

Once you're happy with the show, save your video and give it a name.

After saving, the next step is to click the Continue button. This will take you to a screen where you pick the product you would like to create or use to distribute your show. Click on the DVD tab and then click on DVD to order a single DVD. Note that you can also order a Glamour DVD which includes a very nice customized case.

After you click on the DVD button you will be presented with a screen that will allow you to customize the design on the front of the DVD. First select the design you would like to use.

Pixorial Videos Shows Shop demo@pixorial.com Log Out Account How To

Step One: create a show **Step Two:** select a product **Step Three:** customize

Customize

1. Selected Show: The Soccer Video
2. Select Your DVD Template

Categories: Standard Glamour

3. Add a Title and Message To Your DVD

The DVD label will be printed as you see it here.

The next thing I can customize are the title areas. Once you're done with this, click the Continue button.

3. Add a Title and Message To Your DVD

The DVD label will be printed as you see it here.

Continue **Cancel**

The next step is to choose to whom you would like to send the DVD. By default, the account holder's name is listed here, but you can also click the Add Contact button to add other people. To mail a DVD you will need to include the physical address of the person.

The screenshot shows the Pixorial website interface. At the top, there are navigation links for Videos, Shows, and Shop. The user is logged in as 'demo@pixorial.com' with options for Log Out, Account, and New TV. The main content area is titled 'Dvd Recipients' and includes a 'Choose Recipients' section with 'Send' and 'First' tabs. Below this, there are recipient cards for 'me' and 'Gina', with an 'Add Contact' button. A 'Proceed to Checkout' section is visible at the bottom left. A 'New Address' modal form is overlaid in the center, containing a note about shipping to the United States and several input fields: First name, Last name, Email address, Shipping address 1, Shipping address 2, Shipping city, Shipping state (a dropdown menu), and Shipping zip. The form has 'Save' and 'Cancel' buttons at the bottom.

Then, click the Add to Cart button.
